Top Individually Owned Windows Container Repositories

Weekly report: 2026-11-05 | Rolling activity window: 30 days

Ranked from the current GitHub search snapshot; native Windows containers are tier A, while Windows-host and WSL tooling are tier B. Problem summaries are capability-based inferences from repository descriptions; potential scenarios are suggestions, not verified roadmap commitments.

#	Repository	URL	Score	Problem solved	Potential scenario	Tier / Stars / Forks	Last PR / Merge	Latest discussion
1	libracoder/kiri	https://github.com/libracoder/kiri	78.98/100	It provides a runtime for executing container workloads on Windows.	A potential addition is cross-platform workload compatibility checks in continuous integration.	B / 323 / 27	2026-11-05 2026-11-05	2026-11-05 technical contribution (0.99) Fixed in #28, which builds on your diagnosis here and credits you as co-author. Thank you! Source
2	bacarndiaye/wslc-compose	https://github.com/bacarndiaye/wslc-compose	66.23/100	It reduces manual coordination of multi-container applications.	A potential addition is multi-service integration tests with startup-order and health checks.	B / 33 / 6	2026-11-05 2026-11-05	2026-11-05 other (0.60) release: 0.5.0 Bump to 0.5.0 with `scripts/bump_version.py` (doc pins in sync, check passes). - CHANGELOG: depends_on required:false, wslc 3 Source
3	seiggy/wslc-desktop	https://github.com/seiggy/wslc-desktop	63.15/100	It reduces command-line overhead for managing containers on Windows.	A potential addition is bulk lifecycle operations and accessible multi-project management.	B / 3 / 0	2026-11-05 2026-11-05	2026-11-05 technical contribution (1.00) Separate Store submission packages from public releases ## Summary ```text Release workflow portable ZIPs + Velopack installers/update feeds Source
4	mhackermsft/wslcontainerdesktop	https://github.com/mhackermsft/wslcontainerdesktop	62.32/100	It reduces command-line overhead for managing containers on Windows.	A potential addition is bulk lifecycle operations and accessible multi-project management.	B / 255 / 7	2026-10-26 2026-10-22	2026-11-01 feature/enhancement (1.00) @mhackermsft hi iam new about wlscontainer dont know is this relate just want a feature to mount dir win folder to wlsc so can easly to shar Source
5	DawnMagnet/wslc-compose-go	https://github.com/DawnMagnet/wslc-compose-go	62.27/100	It reduces manual coordination of multi-container applications.	A potential addition is multi-service integration tests with startup-order and health checks.	B / 9 / 0	2026-11-04 2026-11-04	2026-11-04 technical contribution (1.00) v0.2.1: release notes, pin examples to v0.2.1 <!-- CURSOR_AGENT_PR_BODY_BEGIN --> Release notes for v0.2.1 (wslc 3.0.3 `wslc system session Source

6	timeroute/wslc-desktop	https://github.com/timeroute/wslc-desktop	57.82/100	It reduces command-line overhead for managing containers on Windows.	A potential addition is bulk lifecycle operations and accessible multi-project management.	B / 9 / 0	2026-11-04 2026-11-04	2026-11-04 question (0.80) feat: ■■■■■■■■■■■■ <!-- CURSOR_AGENT_PR_BODY_BEGIN --> ## ■■ ■■■■■■■■■■■■■■■■■■■■■■ - ■■■■■■■■ `JavaScript2`■■■■WSLc■■■■■ - ■■■■■■■■■■■■■ - README Source
7	adachi6k/wsltop	https://github.com/adachi6k/wsltop	53.63/100	It makes container resource usage and operational state easier to diagnose on Windows.	A potential addition is resource-threshold alerts and historical performance comparisons.	B / 13 / 2	2026-10-29 2026-10-29	2026-10-29 technical contribution (1.00) chore: release v1.1.0 Release v1.1.0 with the optional `--hide-windows` filter and immediate TUI `w` toggle from #79, based on the contribut Source
8	joshmakestuff/hcsctl	https://github.com/joshmakestuff/hcsctl	47.84/100	It simplifies managing native Windows container isolation, images and networking.	A potential addition is automated isolation and network compatibility tests across Windows releases.	A / 0 / 0	2026-10-28 2026-10-28	2026-10-28 technical contribution (1.00) Add managed guest sharing and VirtioFS mount recovery ## Summary - Deliver boot-scoped managed guest sharing and its journal/recovery founda Source
9	Medalink/watcher	https://github.com/Medalink/watcher	45.76/100	It makes container resource usage and operational state easier to diagnose on Windows.	A potential addition is resource-threshold alerts and historical performance comparisons.	B / 0 / 0	2026-10-29 2026-10-29	2026-10-29 technical contribution (1.00) Follow Signal's rules in the dashboard: grey tiles, shared icons, current Signal, keyboard plots The dashboard now follows Signal's rules: t Source
10	Faulo/docker-choco	https://github.com/Faulo/docker-choco	40.26/100	It simplifies provisioning reproducible Windows container environments.	A potential addition is validated dependency installation across supported Windows base-image versions.	A / 0 / 0	- -	2026-11-01 feature/enhancement (1.00) Windows LTSC 2019: MFTEnumEx waits 120 seconds for ApplicationExtension activation ## Resolution Shipped in [90b9f8b](https://github.com/Fau Source

Scoring and limitations

Weights: stars 15%, forks 10%, clones 10%, latest discussion 15%, latest PR 10%, latest merge 10%, human activity 15%, discussion semantics 15%. Stars, forks and activity are log-scaled; recency decays as exp(-days/15); tier B has a 0.85 multiplier. Unavailable clone data is omitted and its weight redistributed.

Known bot accounts are excluded, but a personal account does not prove human authorship. Activity is sampled from the latest 100 public events; counts can be incomplete. Discussion semantics use keyword heuristics, include issue/PR opening bodies, and may misclassify non-English text. User ownership does not establish employer independence.
