Top Individually Owned Windows Container Repositories

Weekly report: 2026-11-09 | Rolling activity window: 30 days

Ranked from the current GitHub search snapshot; native Windows containers are tier A, while Windows-host and WSL tooling are tier B. Problem summaries are capability-based inferences from repository descriptions; potential scenarios are suggestions, not verified roadmap commitments.

#	Repository	URL	Score	Problem solved	Potential scenario	Tier / Stars / Forks	Last PR / Merge	Latest discussion
1	libracoder/kiri	https://github.com/libracoder/kiri	83.53/100	It provides a runtime for executing container workloads on Windows.	A potential addition is cross-platform workload compatibility checks in continuous integration.	B / 1376 / 88	2026-11-10 2026-11-10	2026-11-10 feature/enhancement (1.00) Domain router: a container that publishes port 80 or 443 gets it ## Summary A container that publishes host port 80 or 443 now gets it. Kiri Source
2	bacarndiaye/wslc-compose	https://github.com/bacarndiaye/wslc-compose	72.14/100	It reduces manual coordination of multi-container applications.	A potential addition is multi-service integration tests with startup-order and health checks.	B / 38 / 6	2026-11-09 2026-11-09	2026-11-09 technical contribution (1.00) release: 0.6.0 Bump to 0.6.0 with `scripts/bump_version.py` (doc pins in sync, check passes). - CHANGELOG: 0.6.0 = the audit fixes of #56 (i Source
3	adachi6k/wsltop	https://github.com/adachi6k/wsltop	61.05/100	It makes container resource usage and operational state easier to diagnose on Windows.	A potential addition is resource-threshold alerts and historical performance comparisons.	B / 13 / 2	2026-11-06 2026-11-06	2026-11-06 technical contribution (1.00) chore: release v1.1.1 Prepare v1.1.1 for the BuildKit correctness fixes merged in #82: attribute embedded executors to Docker, keep incomple Source
4	mhackermsft/wslcontainerdesktop	https://github.com/mhackermsft/wslcontainerdesktop	57.70/100	It reduces command-line overhead for managing containers on Windows.	A potential addition is bulk lifecycle operations and accessible multi-project management.	B / 257 / 7	2026-10-26 2026-10-22	2026-11-01 feature/enhancement (1.00) @mhackermsft hi iam new about wlscontainer dont know is this relate just want a feature to mount dir win folder to wlsc so can easly to shar Source
5	DawnMagnet/wslc-compose-go	https://github.com/DawnMagnet/wslc-compose-go	55.28/100	It reduces manual coordination of multi-container applications.	A potential addition is multi-service integration tests with startup-order and health checks.	B / 11 / 0	2026-11-04 2026-11-04	2026-11-04 technical contribution (1.00) v0.2.1: release notes, pin examples to v0.2.1 <!-- CURSOR_AGENT_PR_BODY_BEGIN --> Release notes for v0.2.1 (wslc 3.0.3 `wslc system session Source

A potential addition is automated isolation and network compatibility tests across Windows releases.	A / 0 / 0	2026-10-18 -	2026-10-20 technical contribution (1.00) ### Documentation and preview publicity checkpoint — 2026-10-20 Committed public-safe README, acceptance evidence hashes, publication kit an Source

Scoring and limitations

Weights: stars 15%, forks 10%, clones 10%, latest discussion 15%, latest PR 10%, latest merge 10%, human activity 15%, discussion semantics 15%. Stars, forks and activity are log-scaled; recency decays as exp(-days/15); tier B has a 0.85 multiplier. Unavailable clone data is omitted and its weight redistributed.

Known bot accounts are excluded, but a personal account does not prove human authorship. Activity is sampled from the latest 100 public events; counts can be incomplete. Discussion semantics use keyword heuristics, include issue/PR opening bodies, and may misclassify non-English text. User ownership does not establish employer independence.
